
BEL: Contributing to nation building

Pioneering a revolution in the art and craft of infrastructure development, Bhagheeratha Engineering Ltd (BEL) was incorporated at Kochi on November 26, 1976 and has now emerged as one of the 10 most reputed companies in India. Five-times national award winner for constructing the world's most outstanding bridges, Bhagheeratha has done remarkable contributions to nation building by constructing major infrastructure projects all over India, which include the dam constructed for NEEPCO — one of Asia's largest rock

fill dams, bridges executed for the Indian Railways and national highways, the bridges and tunnels built for Konkan railway in difficult environment, the impressive main canal of the Narmada project, one of the world's largest irrigation networks and many other such prestigious projects.

Bhageeratha Engineering Limited has long-standing established working arrangements with renowned design and engineering consultants of repute. Timely

execution of projects has been our tradition and BEL enjoys the reputation of having consistently met tough deadlines and in some cases ahead of schedule. Economical designers, innovative construction methodology and adequate resources of men and machines are the keystones of BEL's success.

BEL was certified for Quality System conforming to ISO-9002: 1994 in February 2000 in the area of Civil Construction of Infrastructural Projects by M/s Det Norske Veritas, the Netherlands. Our certificate have been upgraded to ISO-9001: 2000. BEL is one of the very few companies which has acquired this certification.

BEL are the contractors for the Tawi bridge, having a span of 102 m and constructed using cantilever technique.
