

CALL FOR PAPERS

January 2024 Themed Issue of ICJ

Carbon-Neutral and Sustainable Infrastructure Development

In order to focus on growing demand for eco-friendly construction methods across the globe, driven by society's heightened focus on reducing carbon emissions and mitigating climate change, there is a themed edition planned in the ICJ that will enable researchers and industry experts to share their knowledge and make a positive impact on the construction industry and research community.

The themed edition will cover following topics:

- The development and enhancement of infrastructure carbon emission monitoring systems.
- Studying the combined effects and influencing factors in infrastructure carbon emission reduction.
- Evaluating the effectiveness of policies aimed at reducing carbon emissions in infrastructure and improving efficiency.
- Charting pathways to improve the quality of green and low-carbon development.
- Formulating strategies and policies to facilitate green and low-carbon transformations in infrastructure development.
- Other relevant topics

All manuscripts are subjected to double blind peer-review and on successful completion these will be published in the thematic editions scheduled in the month of January 2024.

All potential contributors who would like to accept this invitation and contribute to the themed edition are requested to share the tentative title of the paper. Please email us at: icj@adani.com with subject: [Title of the themed edition]

Guest Editor : Prof. Vasant Matsagar
Indian Institute of Technology (IIT) Delhi, India

Submission deadline : Wednesday, 15th November 2023

Submission guidelines : <https://icjonline.com/downloads/contributors-guidelines-2019.pdf>

Review Process : Double-blind peer review

Submit your paper : https://icjonline.com/be_an_author or email: info@adani.com
